§ 1126.13 Producer milk.

Producer milk means the skim milk and butterfat contained in milk of a producer that is:

(a) Received at a pool plant directly from such producer by the operator of the plant;

(b) Received by a handler described in § 1126.9(c);

(c) Picked up from the producer's farm tank in a tank truck owned and operated by, or under the control of, the operator of a pool plant but which is not received at a plant until the following month. Such milk shall be considered as having been received by the handler during the month in which it is picked up at the producer's farm and shall be priced at the location of the plant where it is physically received in the following month. This paragraph shall apply in like manner to milk received by the operator of a pool plant who, in accordance with § 1126.9(c), is the handler for such milk;

(d) Diverted from a pool plant described in § 1126.7(a) for the account of the handler operating such plant to another pool plant, except that milk diverted to a plant operated by a cooperative association may not be milk of the cooperative association's members. Milk so diverted shall be priced at the plant to which diverted; or

(e) Diverted from a pool plant to a nonpool plant that is not a producer-handler plant for the account of the handler operating such pool plant or a handler described in § 1126.9(b), subject to the following conditions:

(1) Milk of a dairy farmer shall not be eligible for diversion during any month unless milk of such dairy farmer was physically received as producer milk at a pool plant and the dairy farmer has continuously retained producer status

since that time and further, during each of the months of September through January not less than 15 percent of the milk of such dairy farmer is physically received as producer milk at a pool plant. If a dairy farmer loses his producer status under this order (except as a result of a temporary loss of Grade A approval), his milk shall not be eligible for diversion until milk of such dairy farmer has been physically received as producer milk at a pool plant;

(2) The total quantity of milk so diverted during the month by a cooperative association shall not exceed one-third of the producer milk that the cooperative association causes to be delivered during the month to pool plants described in §1126.7(a), (b), (c), and (d) and that is physically received thereat;

(3) The operator of a pool plant that is not a cooperative association may divert any milk that is not under the control of a cooperative association that diverts milk during the month pursuant to paragraph (e)(2) of this section. The total quantity of milk so diverted during the month shall not exceed one-third of the producer milk physically received at such pool plant during the month that is eligible to be diverted by the plant operator;

(4) Any milk diverted in excess of the limits prescribed in paragraphs (e) (2) and (3) of this section shall not be producer milk. If the diverting handler fails to designate the dairy farmers' deliveries that are not to be producer milk, no milk diverted by the handler during the month to a nonpool plant shall be producer milk;

(5) The quantity of milk diverted for the account of a cooperative association from a pool plant of another handler that would cause the pool plant to become a nonpool plant shall not be producer milk; and

(6) Diverted milk shall be priced at the location of the plant to which diverted.
